

Bauer Welding Expands Aluminum Robotic Welding Capabilities

Robotic Welding Capabilities have expanded at Bauer with the addition of a third Panasonic robotic welding cell. What an opportunity to increase productivity and help make consistently good parts for our trusted customers! This new addition will enhance Bauer's aluminum capabilities and offer improved welding efficiencies to our customers. This robotic welding cell joins two others already in regular use at Bauer. Our knowledgeable and experienced staff of welders find this robot to be easy to work with and reliable. These expanded capabilities make us faster, more accurate and increase efficiency, all in the name of value-added services for our customers.
