

Bauer Welding Adds Bending Capacity

8/5/2010

Bauer Welding & Metal Fabricators, Inc. has recently added a new 3.00" OD tube bender with triple stack head shifter capability to further increase our capabilities in the tube bending area. With the triple head shifter capabilities Bauer is able to bend multiple radius bent parts in one cycle or to be able to bend complex multi-bend parts with minimal distances between the bends. This is our third bender with multi-head shifter capabilities.

For additional information, or a Quotation on your product, please: • Call Bauer at 763-786-6025 • Fax your Part Print and RFQ to Sales at 763-786-7447 • Email your Part Print and RFQ to us at Sales@bauerweld.com.
